SUMMARY

Software engineer with hands-on experience building and deploying full-stack web applications using React, Node.js, PostgreSQL, and AWS. Background in healthcare operations, currently pursuing AWS Solutions Architect Associate certification.

EDUCATION

Post University

Bachelor of Science, Computer Information Systems

Waterbury, CT

Aug. 2023 – May 2027

Colt Steele's Full Stack Web Development Bootcamp

Udemy

Jan. 2026 – Mar. 2026

EXPERIENCE

Software Engineer Intern

Health Genie LLC

June 2026 – Present

Remote

- Researched food insecurity and childhood obesity trends to ground platform design in real community need
- Designed the UI/UX and logo in Figma (color schematics, full prototype) to give the team a validated design direction before writing code, preventing rework
- Built the frontend in React to translate the Figma prototype into a working, responsive web app for families accessing nutrition resources
- Developed a Python-based API to power the platform's data layer, connecting the frontend to the underlying nutrition/food-access data
- Evaluated web hosting options to determine the right deployment path for a nonprofit-facing platform, balancing cost and reliability

Front Office Staff

Access Rehab Centers

May 2020 – Present

Waterbury, CT

- Managed patient scheduling, check-in, and insurance verification across multiple outpatient rehabilitation clinic locations using EMR systems in a HIPAA-compliant environment

PROJECTS

Sage EMR - Electronic Medical Records Platform | *React, Node.js, Express, PostgreSQL, JWT*

July 2026

- Built full-stack EMR platform with role-based access (admin/doctor/staff) and a JWT-authenticated REST API, covering patient records, scheduling, clinical charting, and case management
- Built dynamic scheduling grid with right-click appointment management and waitlist tracking; deployed React frontend to Vercel and Express/PostgreSQL backend to Railway with a public demo login

Dossier - Job Application Tracker | *React, Node.js, Express, PostgreSQL, AWS*

April 2026

- Built full-stack job tracker with JWT authentication and bcrypt password hashing; deployed backend on AWS EC2 with PM2 process management and PostgreSQL database
- Hosted React frontend on AWS S3 with CloudFront CDN distribution and custom error routing

Gas Mileage Calculator | *React, Vite, TailwindCSS, Recharts, REST APIs*

March 2026

- Built React application calculating real fuel costs using live third-party API data, featuring address autocomplete, interactive route map, Recharts fuel breakdown chart, and EV support

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks: React, Node.js, Express.js, TailwindCSS

Databases: PostgreSQL

Cloud/DevOps: AWS (EC2, S3, CloudFront, Security Groups), PM2, Linux CLI, Git

Tools: VS Code, PythonAnywhere, Postman, Vite, Recharts, GitHub
